

▶ Simple, Reliable and Accurate

- Completely Automatic Operation
- Easy Adjustment and Maintenance
- Quality Approved Materials
- World Wide Support

▶ CLA-VAL SERIES 208 Main Function

The CLA-VAL SERIES 208 Modulating Altitude Level Control Valve maintains a constant water level in closed tanks by compensating for variations in supply or demand. It can be installed to control the flow into or out of the reservoir by closing on rising level or opening on decreasing level.

▶ CLA-VAL 208-01 Typical Application

The CLA-VAL 208-01 is typically designed for closed reservoirs where water is withdrawn through a separate line. The desired water level is set by adjusting the spring force.

The CLA-VAL 208-01 is one way flow only. The reservoir pressure sensing line should be 20 mm minimum I.D. installed with 2° slope from the valve to the reservoir to avoid air pockets.

▶ Usual SERIES 208 Combinations

Main Valve	100-01
Level Control Help Matrix	000110DE
Constant Level Control	208-01
