

► Simple, Reliable and Accurate

- Completely Automatic Operation
- Easy Adjustment and Maintenance
- Quality Approved Materials
- World Wide Support

► CLA-VAL SERIE PCM Main Function

The CLA-VAL SERIES PCM is a range of Electronic Actuated Pilot Control Valves that combines precise control of field proven CLA-VAL hydraulic pilots and simple electronic actuated motor.

The CLA-VAL SERIES PCM valves, including a hydraulic pilot and integral controller, which accept a remote set-point command input to make smooth adjustments to the pilot.

► CLA-VAL PCM 40-01 Typical Application

The CLA-VAL PCM 40-01 prevents excessive flow by limiting flow to a preselected maximum rate.

The e-Drive ideally suited to systems where the user wishes to retain hydraulic control whilst having the option of modifying the upstream pressure set-point remotely.

The simple remote changing (4-20 mA analog) of valves set-point is suitable for many applications where the process variable is monitored separately and a SCADA or similar remote control system provides valve control.

Make your valve even Better!

LFS Option?	<u>Control</u> Low flows or night flows
KO Option?	<u>Extend</u> valve life with Anti-Cavitation trim
KG1 Option?	<u>Use</u> stem cleaning for harsh water
Maintenance?	<u>Check</u> on periodic maintenance
Environment?	<u>Adapt</u> to high temperatures or frost risk
Security?	<u>Add</u> hydraulic safety back-up to your valve
Protection?	<u>Remove</u> excessive system overpressures
Corrosion?	<u>Protect</u> your valve with upgraded materials
